R	10+ yrs.
Python	4+ yrs.
JavaScript	8+ yrs.
Rmarkdown	10+ yrs.
Quarto	3+ yrs.
Git	7+ yrs.
MySQL	7+ yrs.
Scrum	5+ yrs.
NPM	3+ yrs.

Summary

I'm a researcher with a focus on meta-research: evaluating and improving (psychological) research methods. I'm a 'nerd' for all things digital. I use R to optimize my workflows, analyze data, create plots, generate my manuscripts, and even create this CV. I also enjoy solving puzzles, learning, and working together with great minds to solve complicated problems.

Activities in my free time greatly depend on the weather! In the summertime, you can find me sailing, hiking, camping, and cycling. But in winter, I tend to hibernate while reading books and watching TV — though occasionally I do make time to go skiing or ice skating.

This PDF highlights key aspects of my CV. For a detailed and interactive version, visit <https://sallyh.nl/CV>

Work

Data Analyst

Oefenweb / Prowise, Amsterdam, The Netherlands

2018 - 2020

Full-time employment as a data-analyst and content creator. Responsible for internal business intelligence (e.g., changes in the number of accounts after changing the subscription structure), AB-testing, psychometric analyses on the functioning of the adaptive system, creating content for new Mathematical/Programming/Language games, attending conferences/events, and creating dashboards.

PhD Student

University of Amsterdam, The Netherlands

2020 - 2021

Full-time employment as a PhD Student (unfinished). Primary focus was on measuring changes in stereotypes through behavioral tasks. The project website is available via <https://bias-barometer.github.io/>. Supervisors: L. van Maanen (Utrecht University); K. Schulz (University of Amsterdam)

Lecturer Methods and Statistics (Psychology)

Open Universiteit, Heerlen, The Netherlands

2021 - 2024

Teaching and grading in the Methods and Statistics course for different Bachelor- and (Pre)Master courses in Psychology. Educational responsibilities include grading papers, optimizing course content, providing feedback, supervising bachelor and master thesis projects, and answering questions. I also conduct psychological research, contribute to optimizing (digital) workflows (e.g., automated system for paper distribution and email alerts), and edit one of our online textbooks ('Onderzoek in de Praktijk').

Lecturer IT, Statistics, and Research Skills

Hogeschool Rotterdam, Rotterdam, The Netherlands

2024 - present

Teaching basic IT (Python, Data Modelling, MySQL), Statistics (descriptives, t-tests, ANOVA's) and research methods to students from the Business IT Management program. Responsibilities include giving lessons, preparing lessonplans (e.g., MySQL), grading tests, and assessing ability.

Portfolio

Computerized Adaptive Programming Concepts Test (CAPCT)

Designed and validated the CAPCT using Item Response Theory to assess childrens' understanding of programming concepts. We collected data from 93,341 Dutch children who provided more than 14 million responses.

[R](#), [RMarkdown](#), [MySQL](#)

[Article](#) // [OSF](#)

Free Associations Game

A 'gamified' experiment to measure free associations. The collected data could be used to create word association networks.

[HTML](#), [CSS](#), [JavaScript](#), [jsPsych](#)

[Demo](#) // [Poster](#) // [Github](#)

Implicit association tests: Stimuli validation from participant responses

We explored validity of stimuli in 15 IATs by performing bootstrap analyses on participant responses.
